

Control mice: normalized count profile: pre-stress

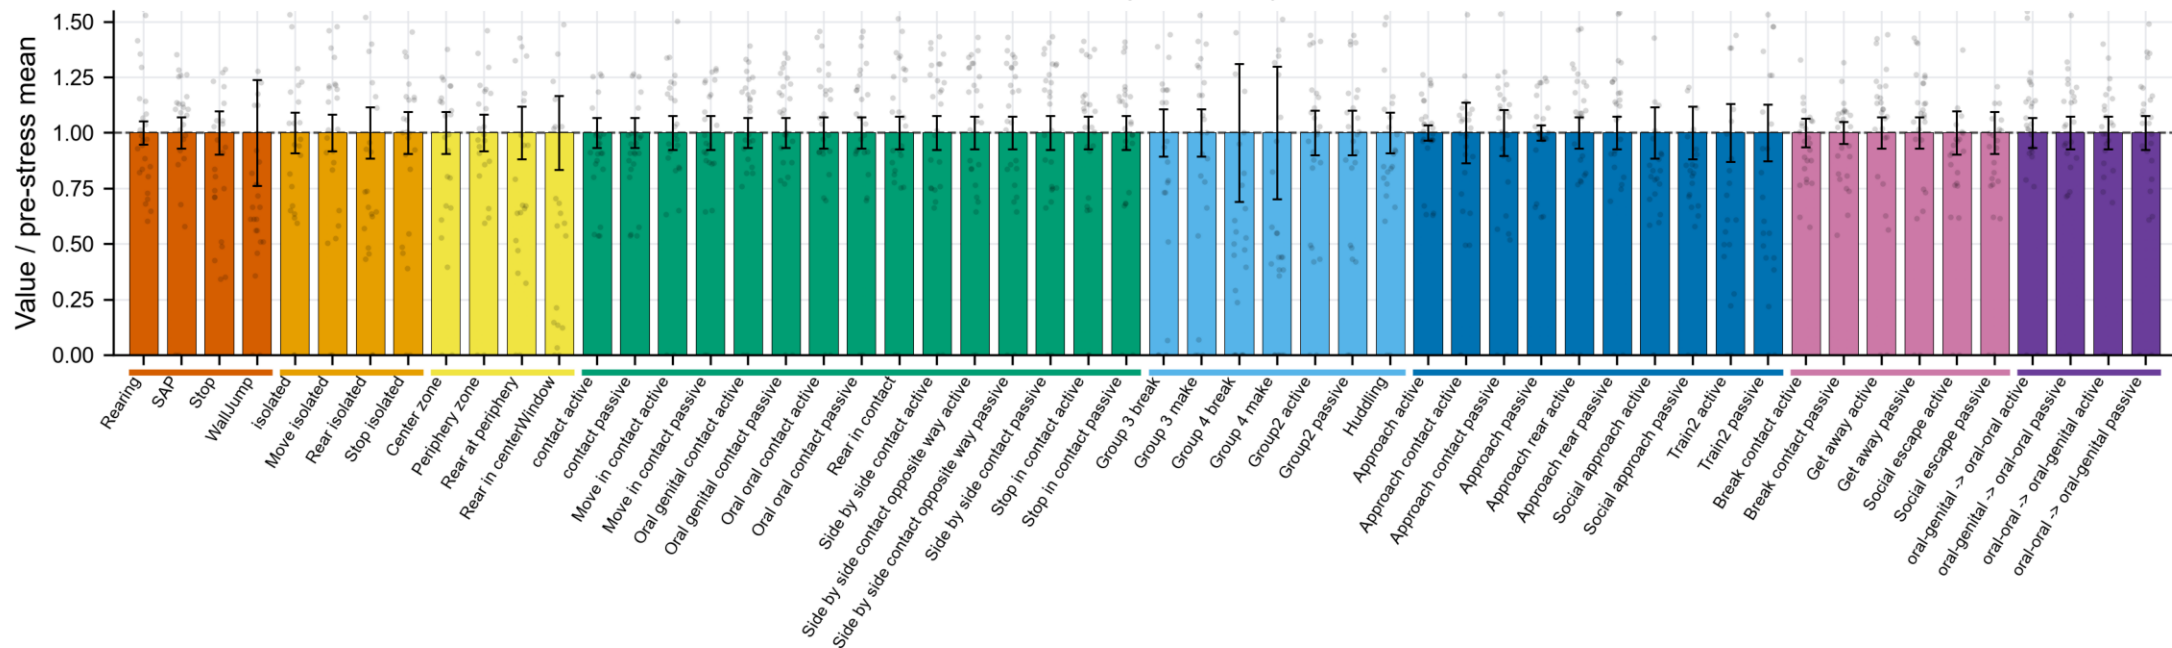

Control mice - Pre-stress day behavioral profile: event counts

Stressed mice: normalized count profile: pre-stress

- Body configuration
- Position/context
- Social configuration
- Social escape
- Contact sequence
- Isolated behavior
- Contact type
- Social approach

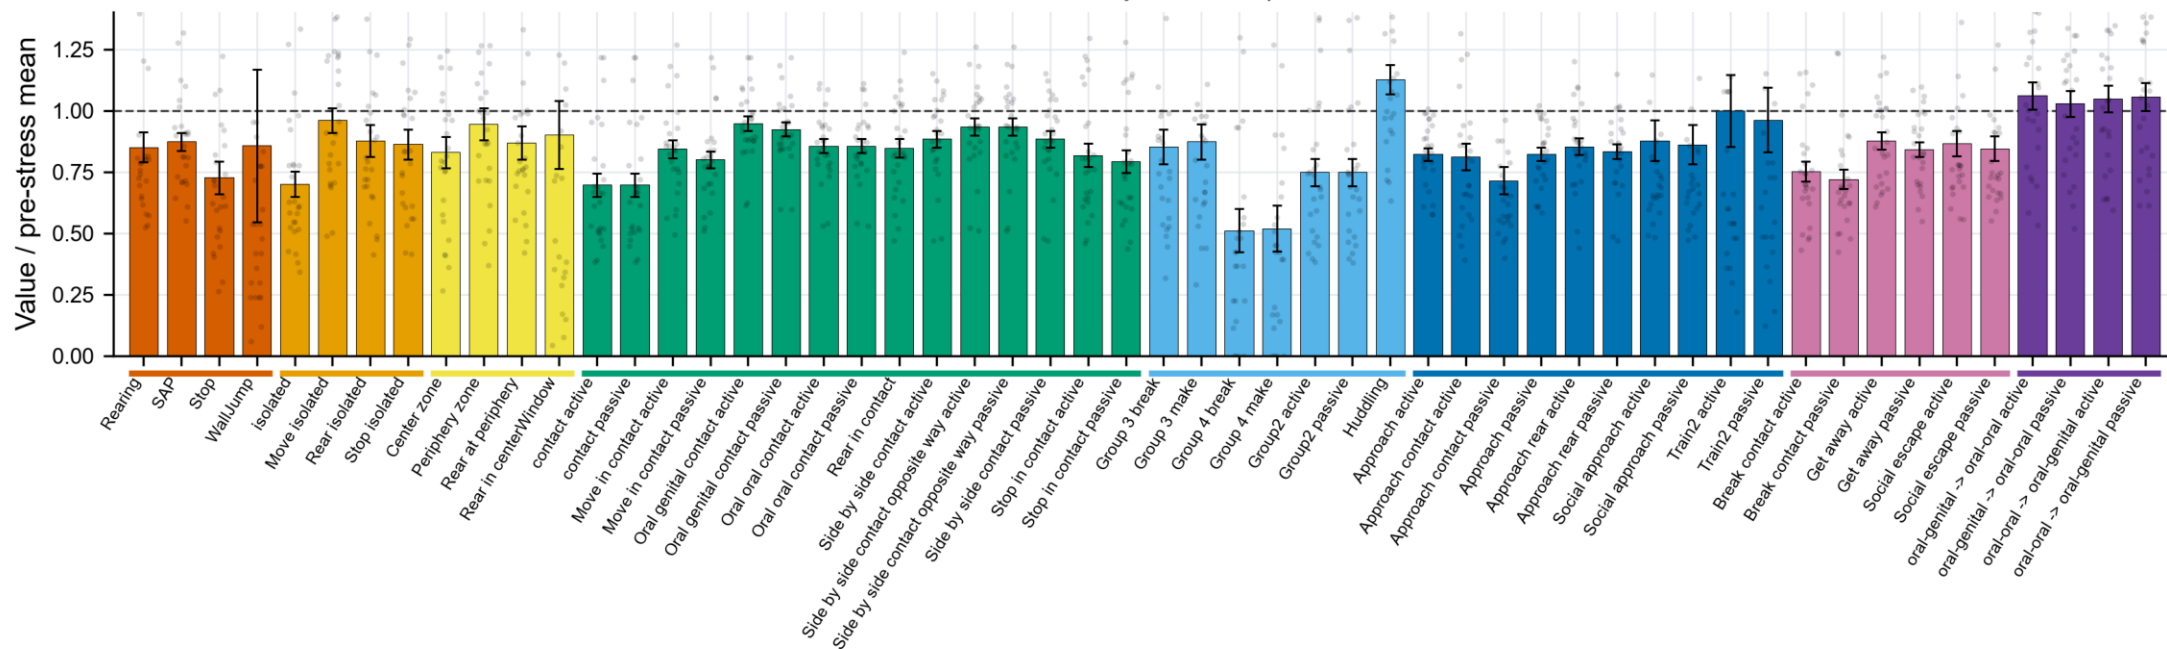

Stressed mice - Pre-stress day behavioral profile: event counts

Control mice: normalized count profile: post-stress

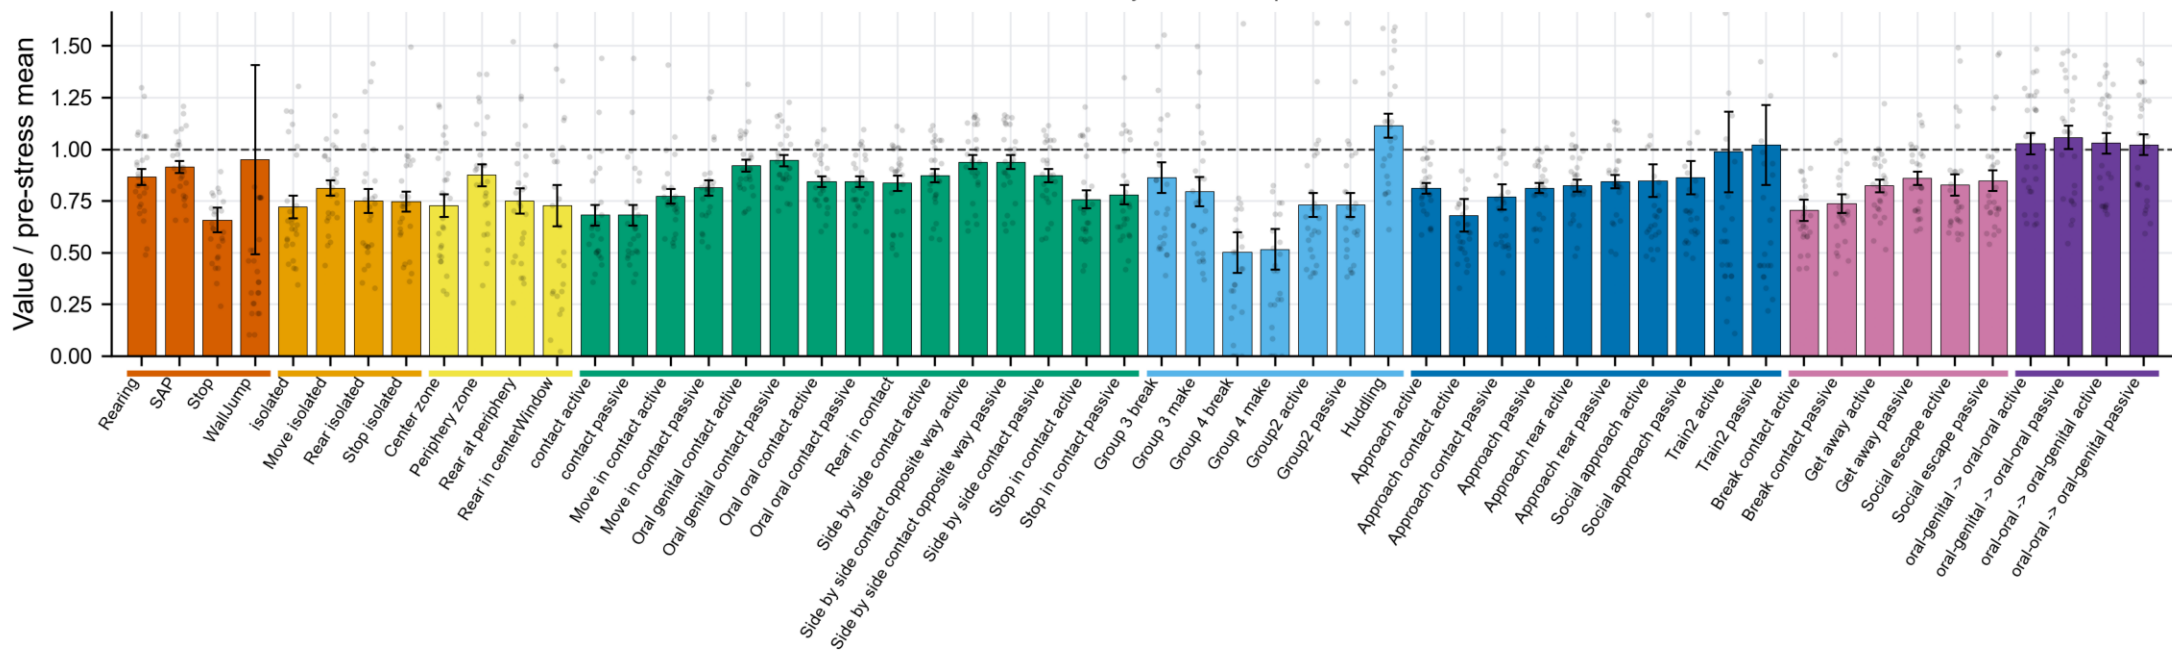

Control mice - Post-stress day behavioral profile: event counts

Stressed mice: normalized count profile: post-stress

- Body configuration
- Isolated behavior
- Position/context
- Contact type
- Social configuration
- Social approach
- Social escape
- Contact sequence

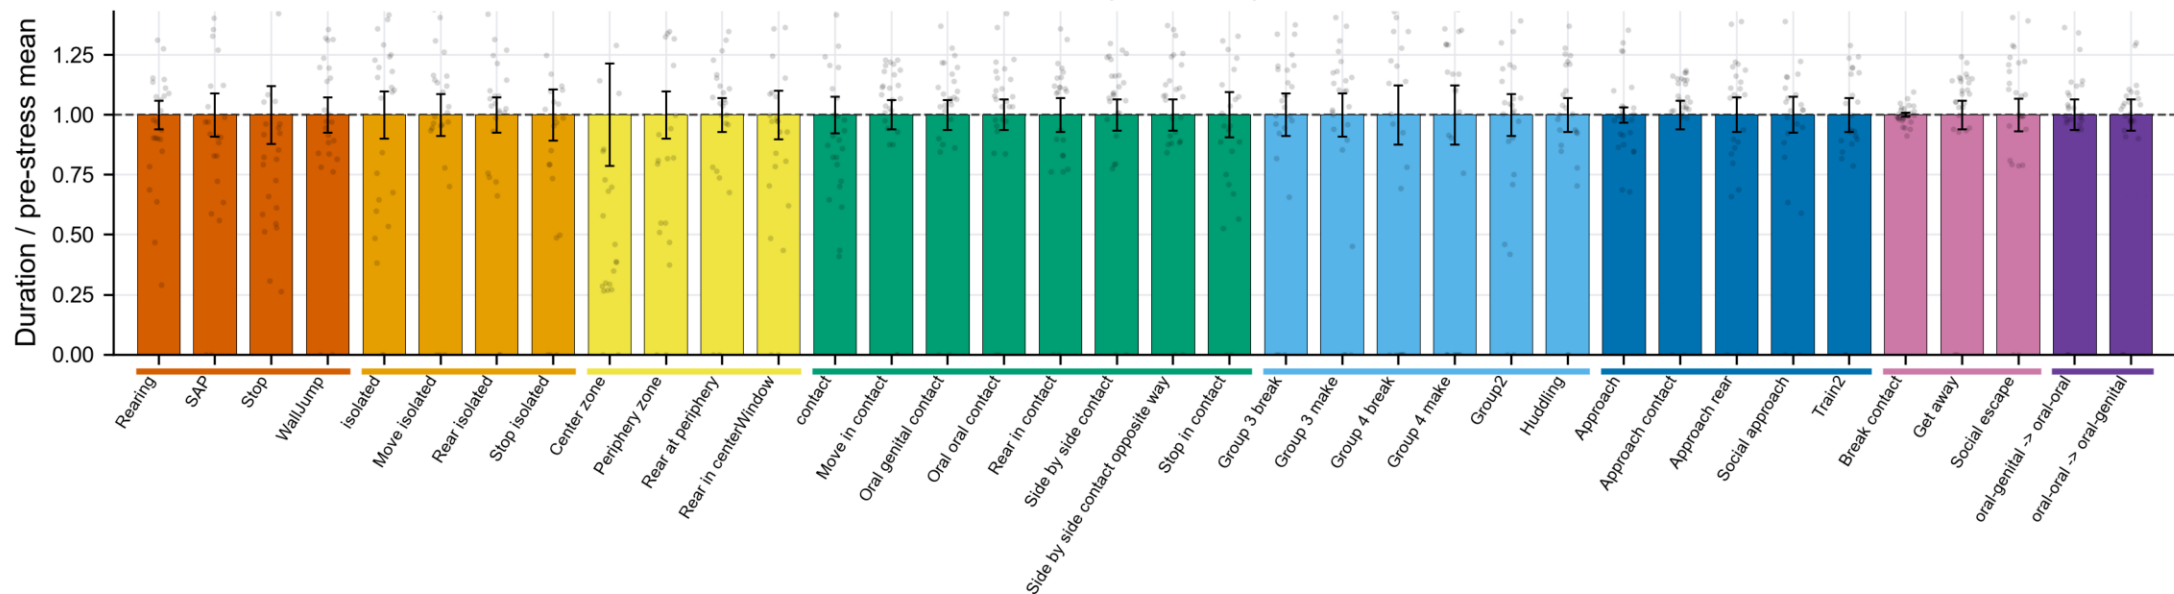

Stressed mice - Post-stress day behavioral profile: event counts

Control mice: normalized mean duration: pre-stress

- Body configuration
- Position/context
- Social configuration
- Social escape
- Contact sequence
- Isolated behavior
- Contact type
- Social approach

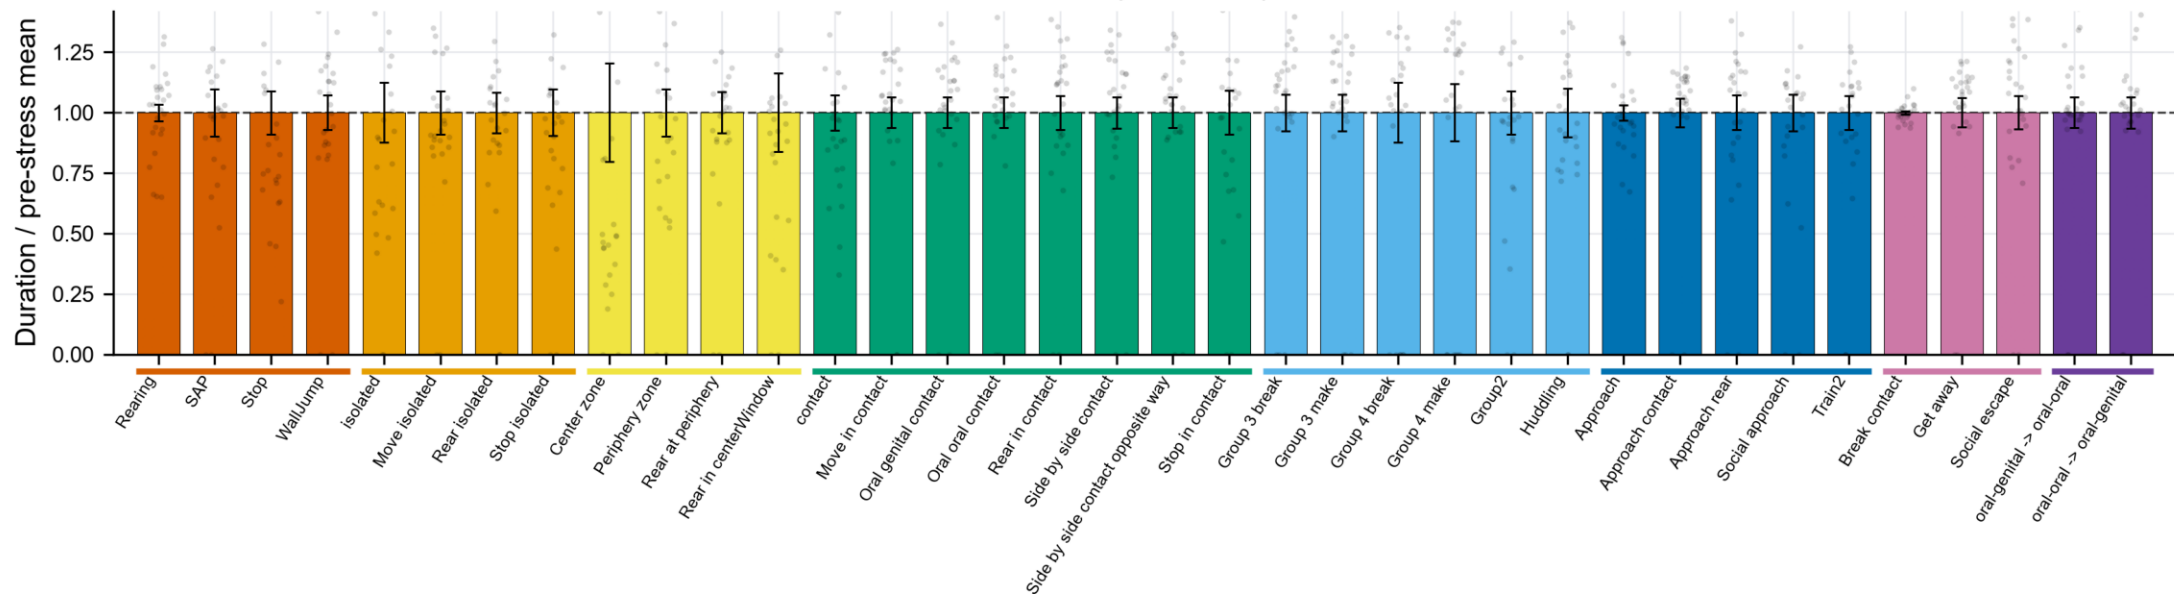

Control mice - Pre-stress day behavioral profile: mean duration

Stressed mice: normalized mean duration: pre-stress

- Body configuration
- Position/context
- Social configuration
- Social escape
- Contact sequence
- Isolated behavior
- Contact type
- Social approach

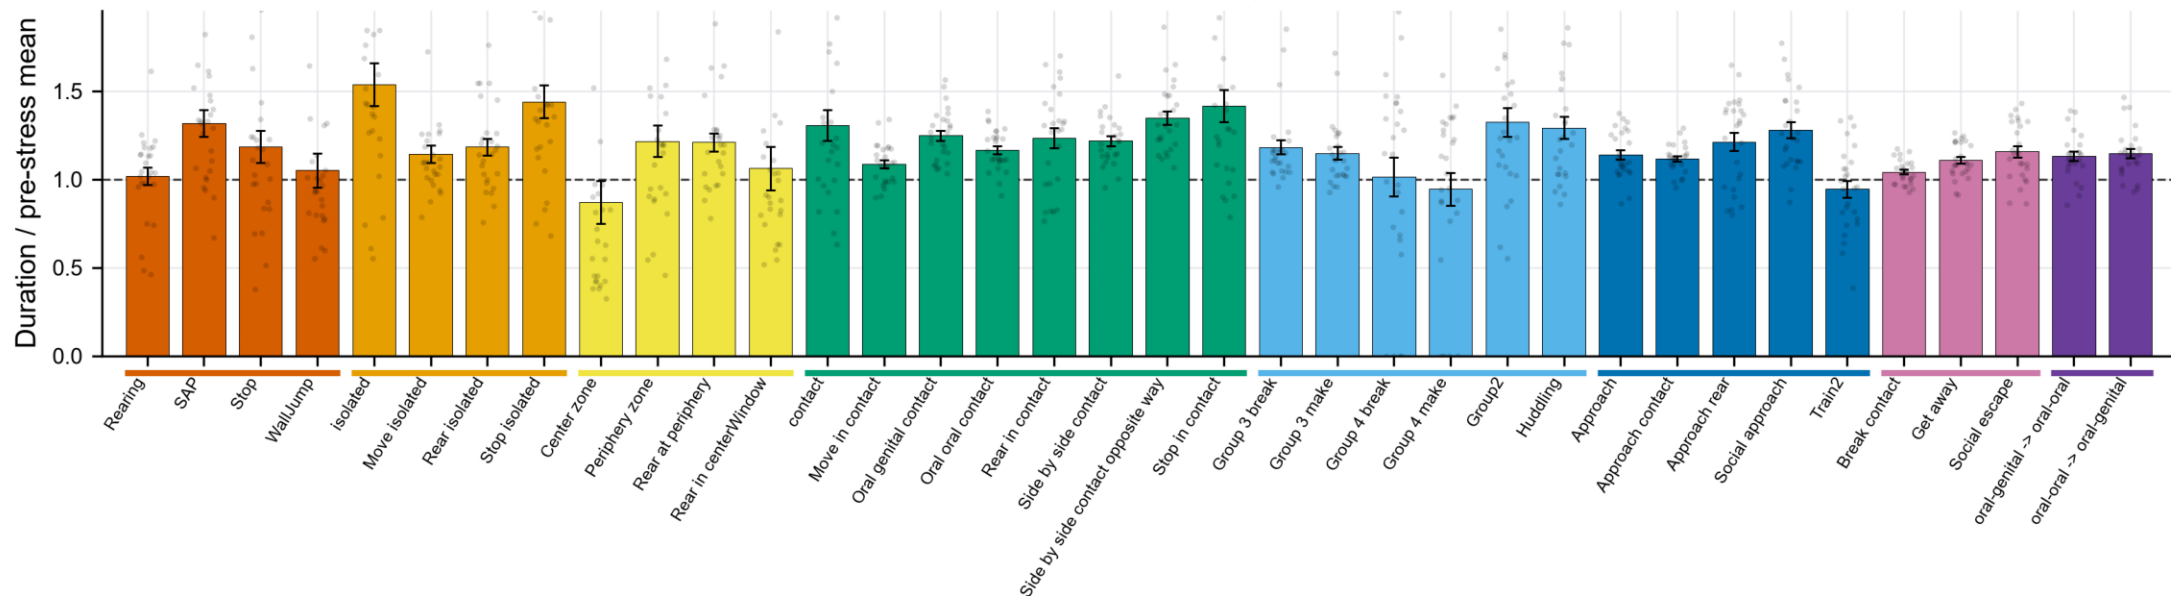

Stressed mice - Pre-stress day behavioral profile: mean duration

Control mice: normalized mean duration: post-stress

- Body configuration
- Isolated behavior
- Position/context
- Contact type
- Social configuration
- Social approach
- Social escape
- Contact sequence

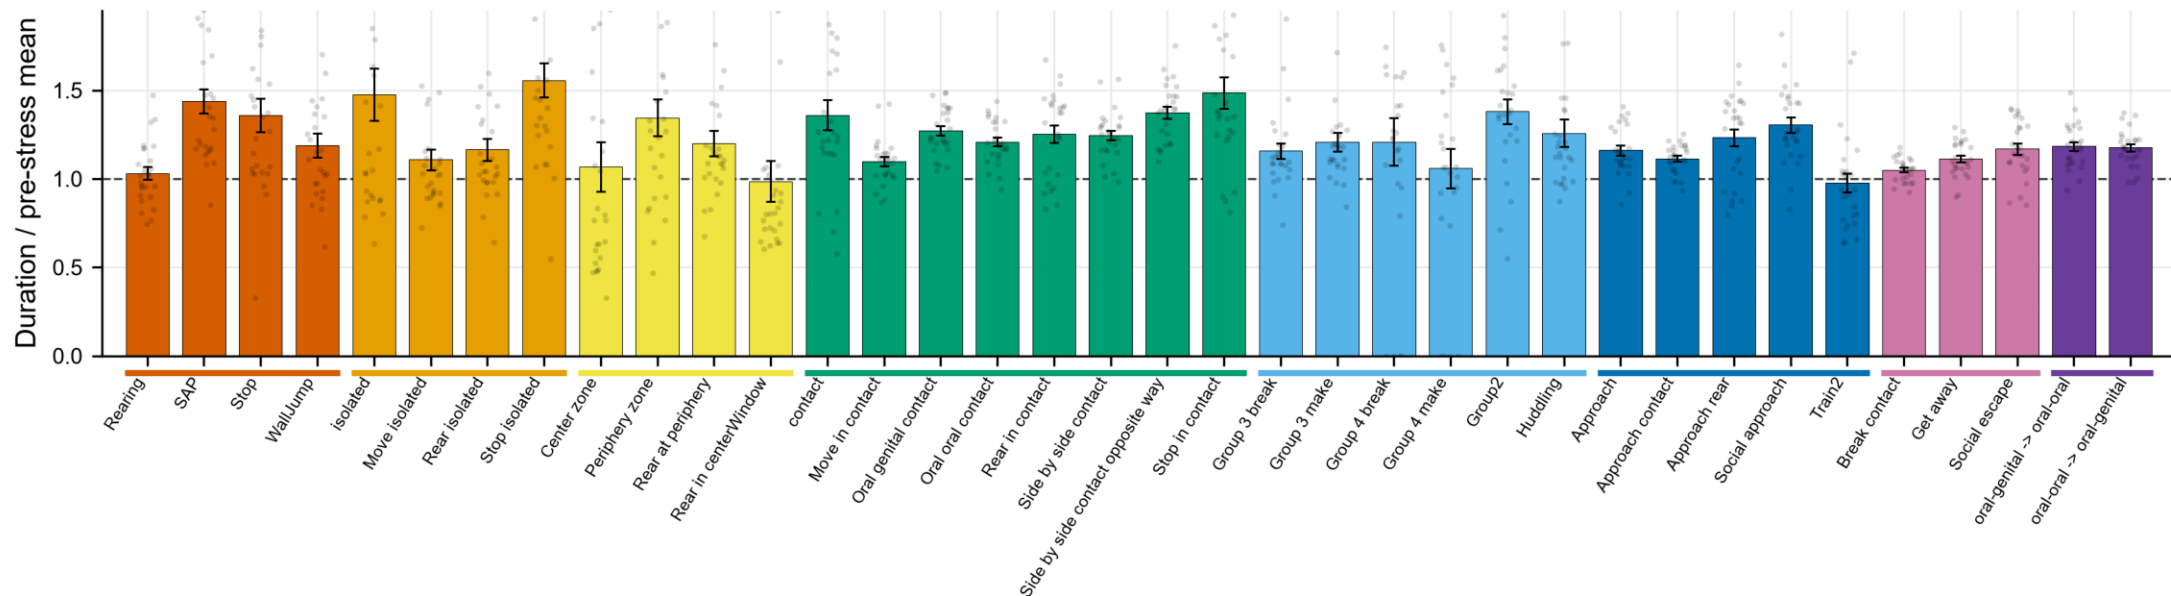

Control mice - Post-stress day behavioral profile: mean duration

Stressed mice: normalized mean duration: post-stress

- Body configuration
- Isolated behavior
- Position/context
- Contact type
- Social configuration
- Social approach
- Social escape
- Contact sequence

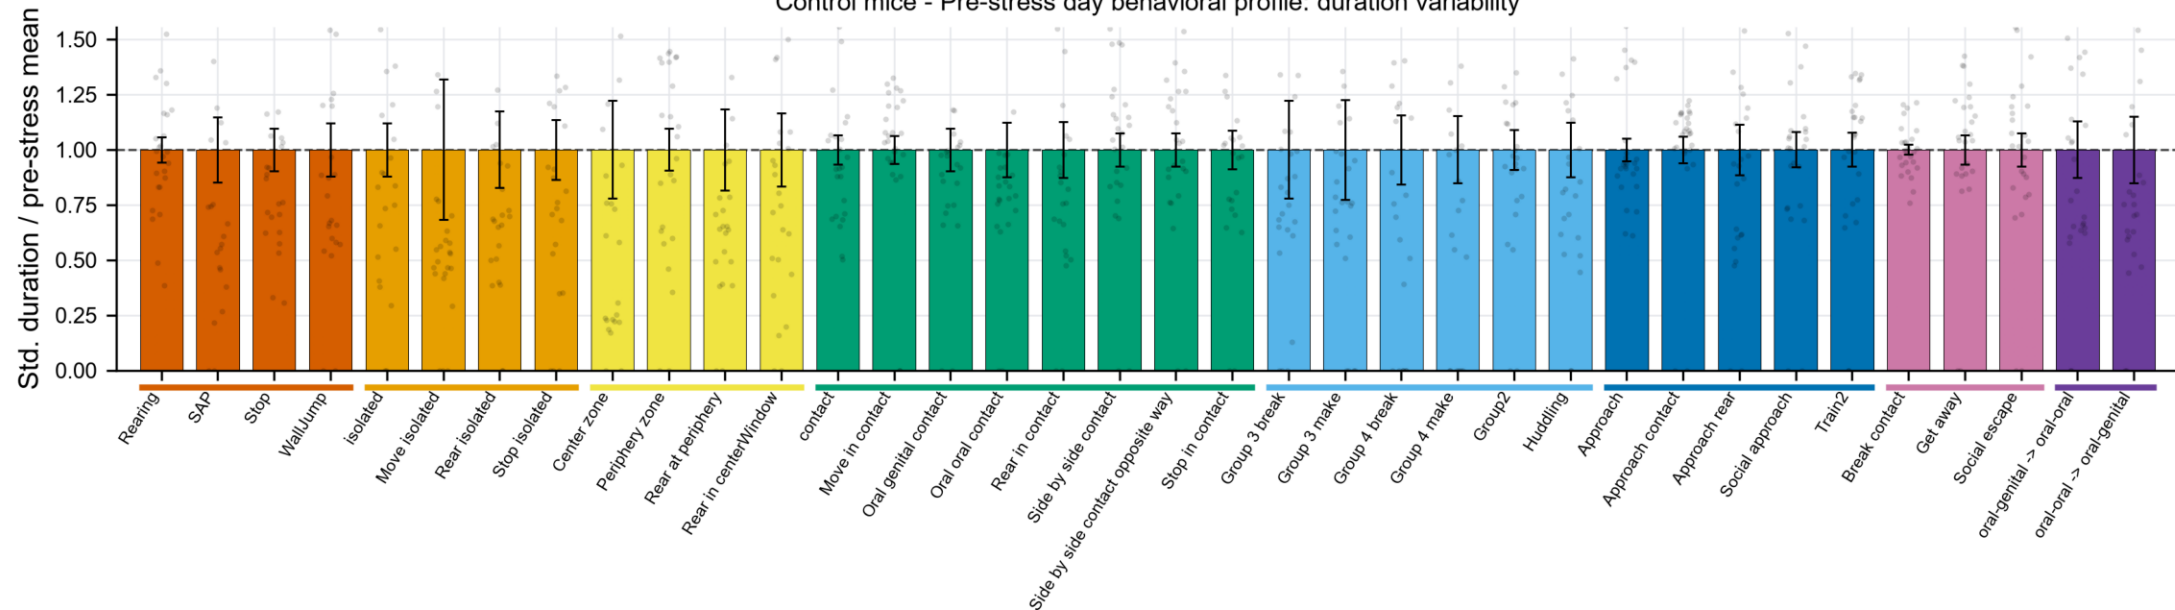

Stressed mice - Post-stress day behavioral profile: mean duration

Control mice: normalized duration variability: pre-stress

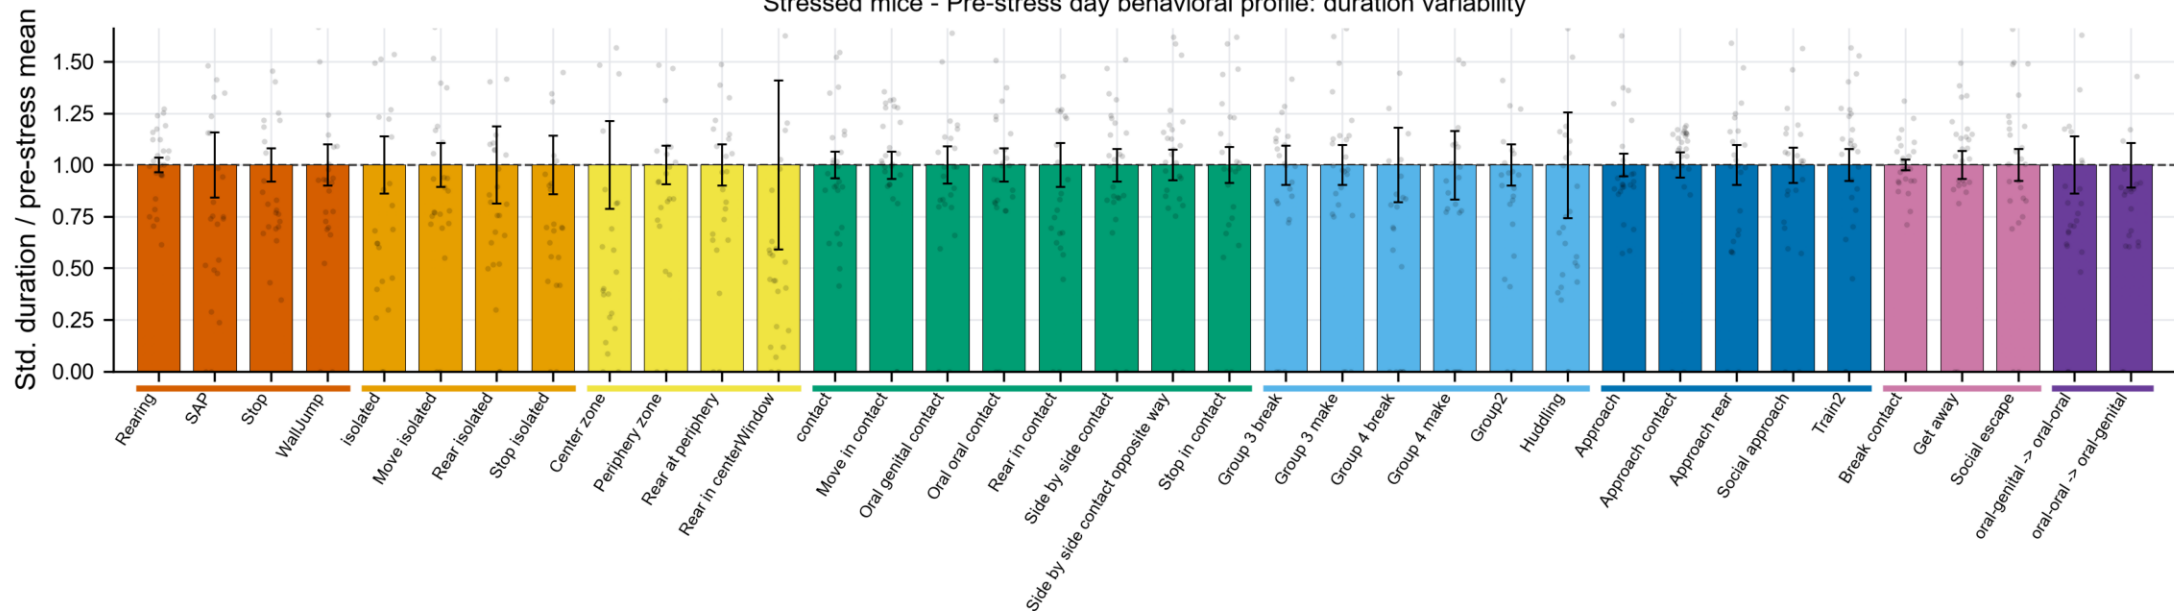

Control mice - Pre-stress day behavioral profile: duration variability

Stressed mice: normalized duration variability: pre-stress

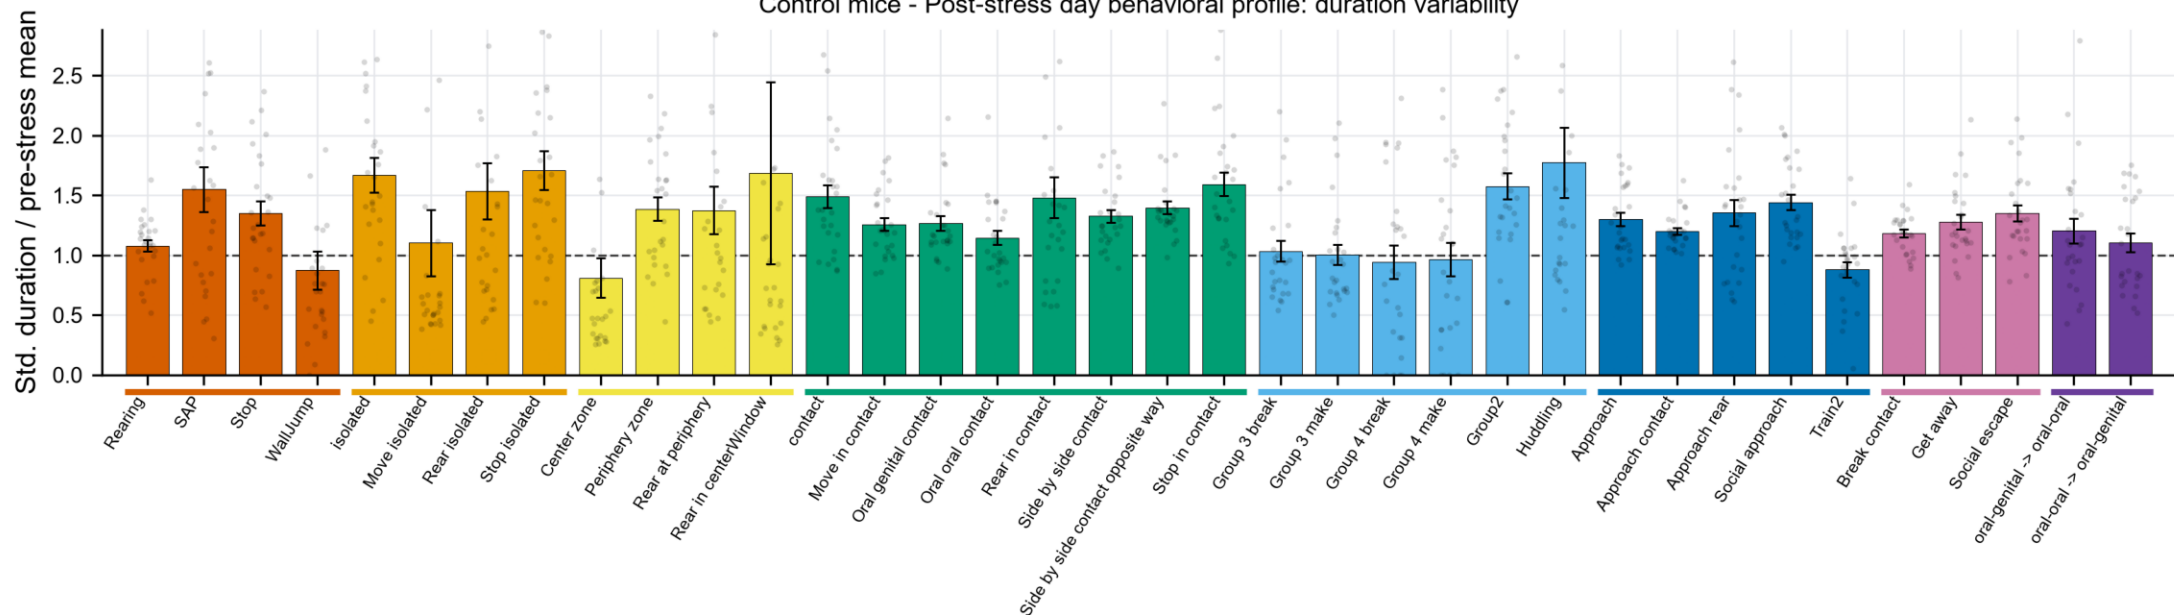

Stressed mice - Pre-stress day behavioral profile: duration variability

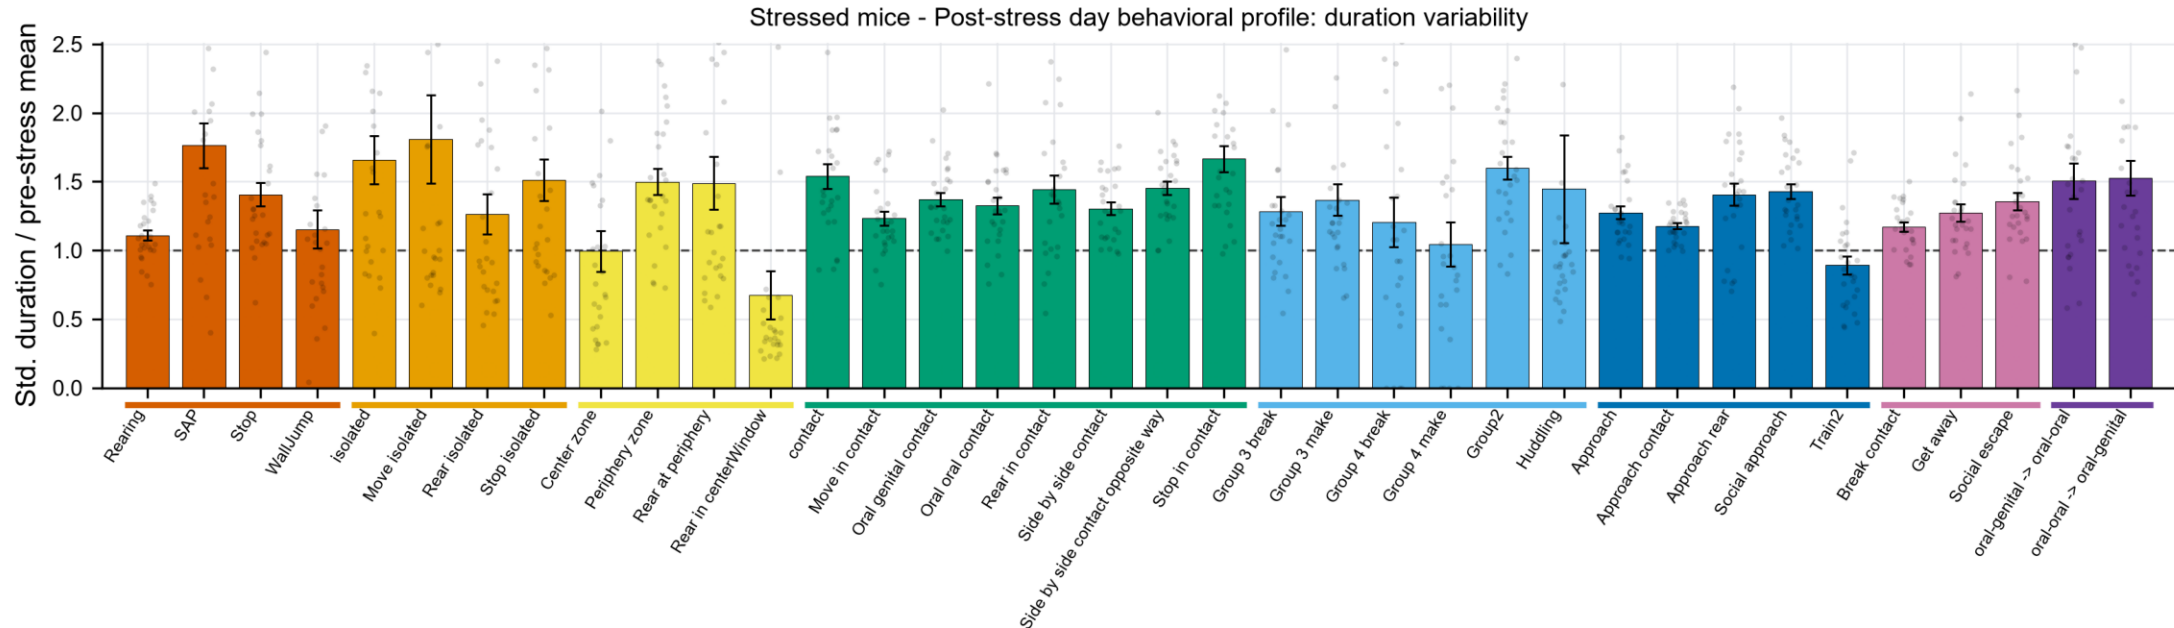

Control mice: normalized duration variability: post-stress

- Body configuration
- Isolated behavior
- Position/context
- Contact type
- Social configuration
- Social approach
- Social escape
- Contact sequence

Stressed mice: normalized duration variability: post-stress

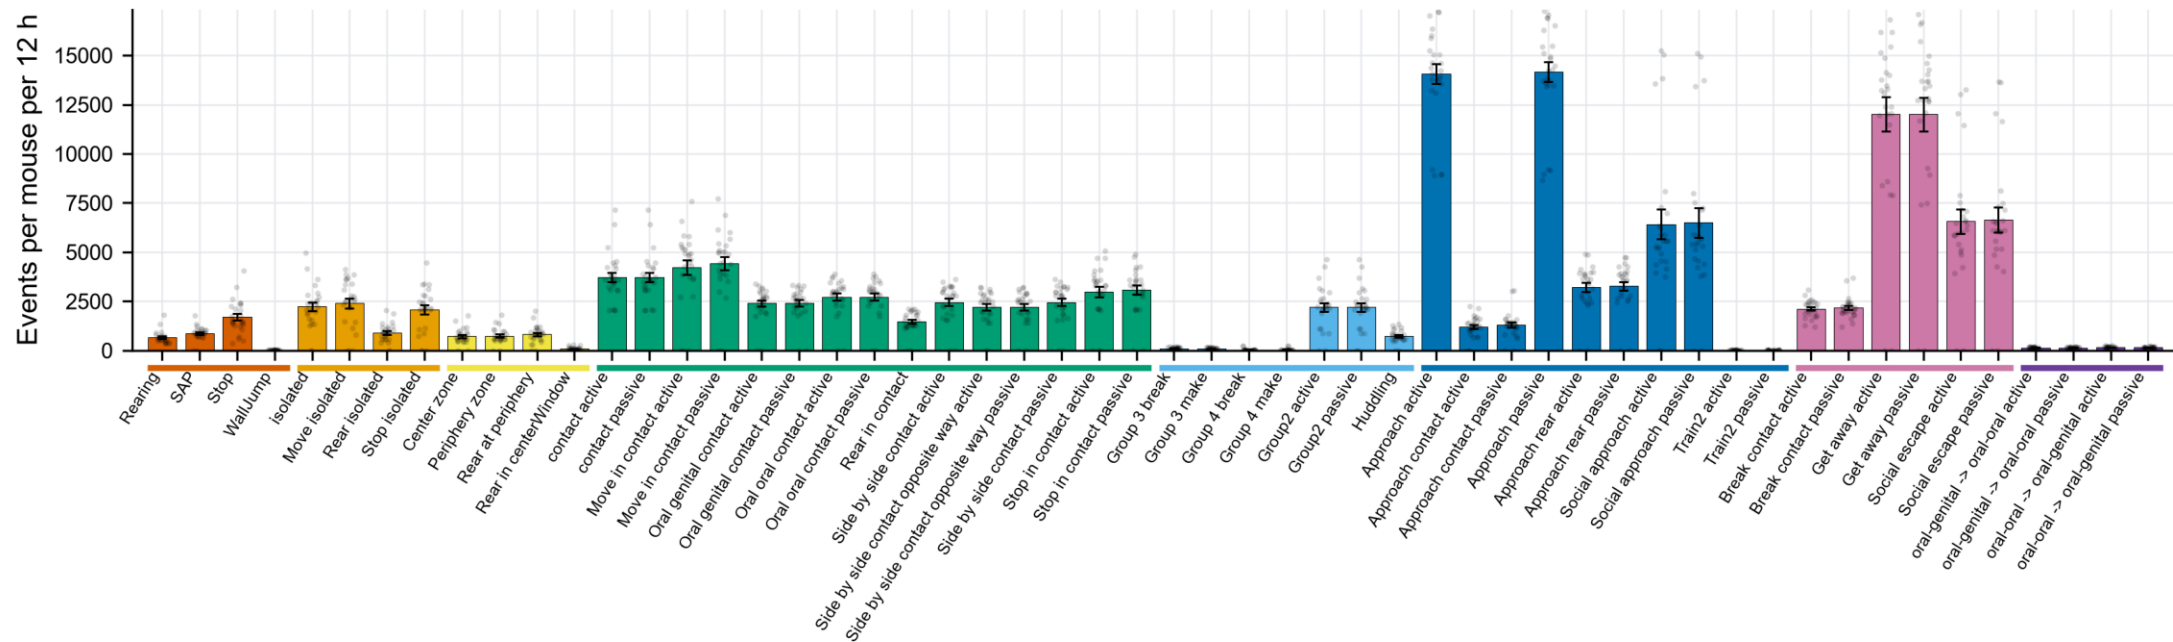

- Body configuration
- Isolated behavior
- Position/context
- Contact type
- Social configuration
- Social approach
- Social escape
- Contact sequence

Control mice: raw event counts: pre-stress

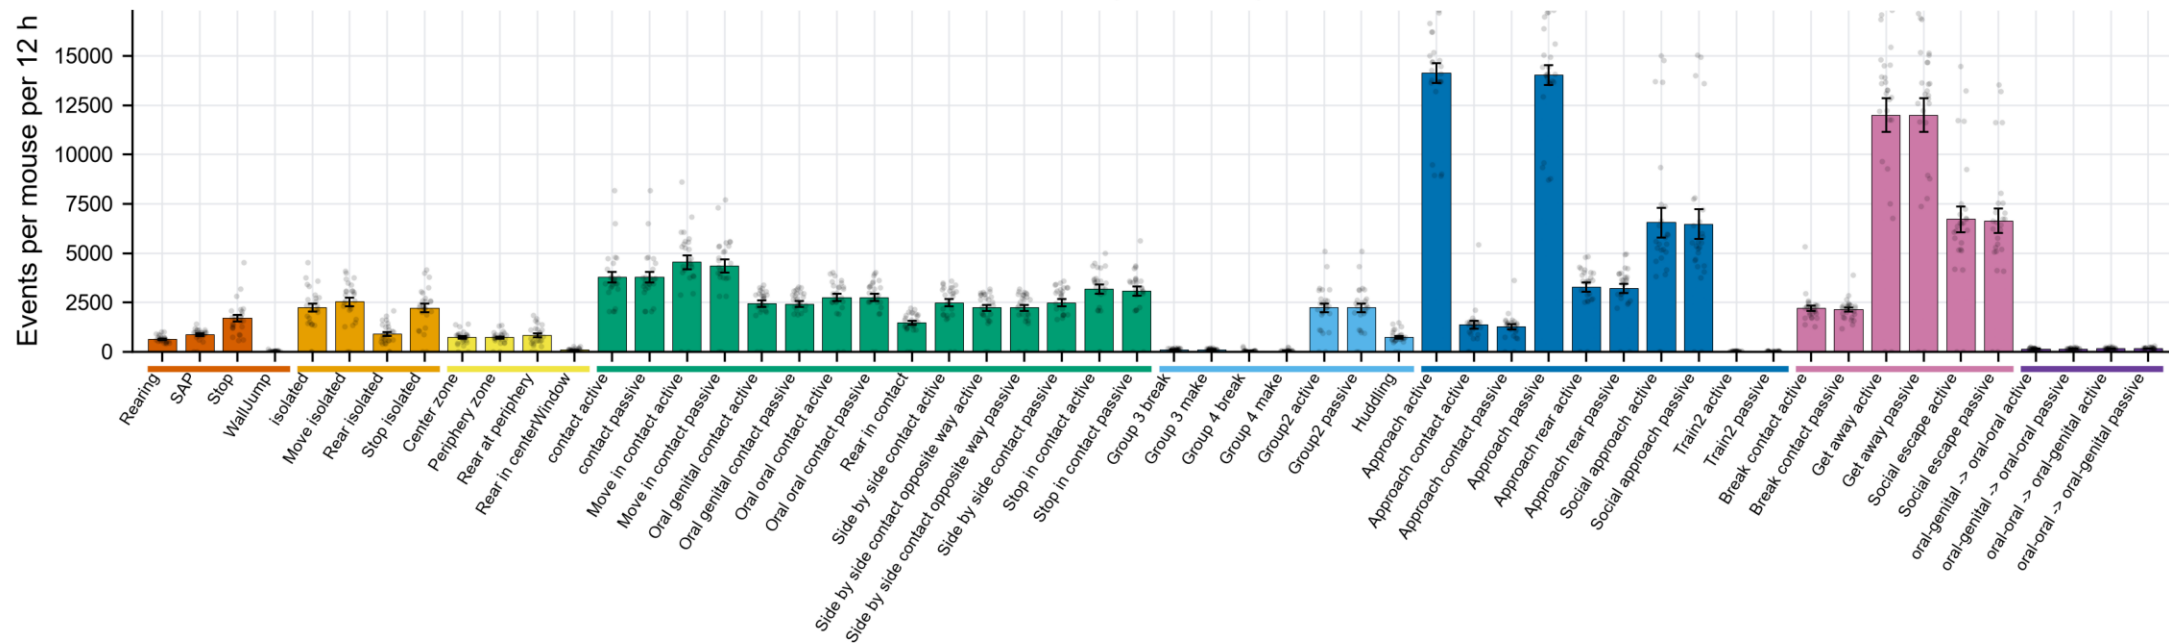

Control mice - Pre-stress day behavioral profile: raw event counts

Stressed mice: raw event counts: pre-stress

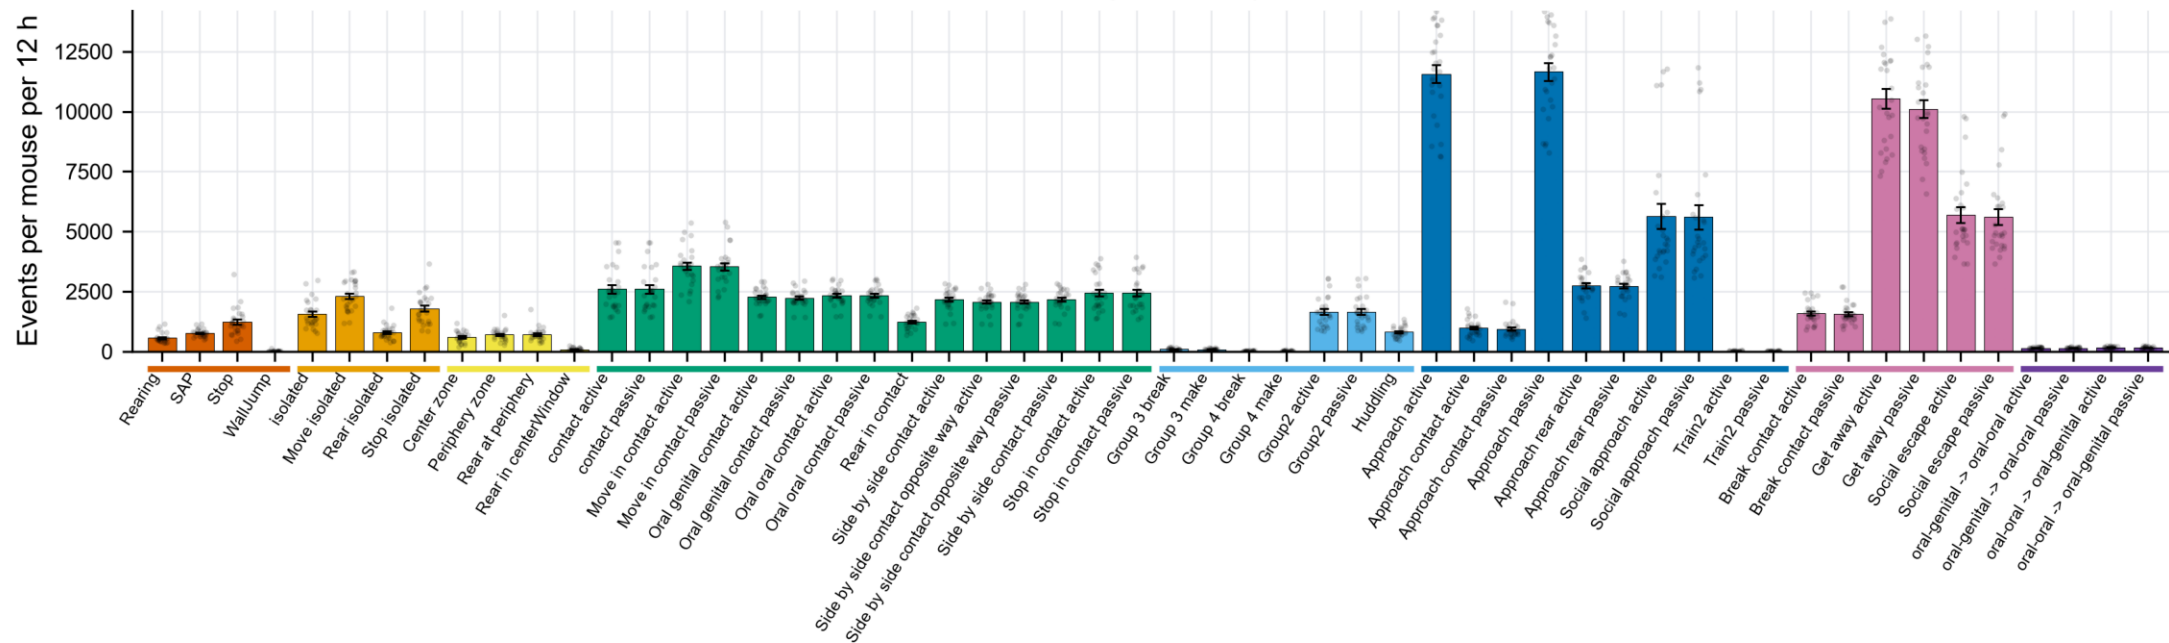

Stressed mice - Pre-stress day behavioral profile: raw event counts

Control mice: raw event counts: post-stress

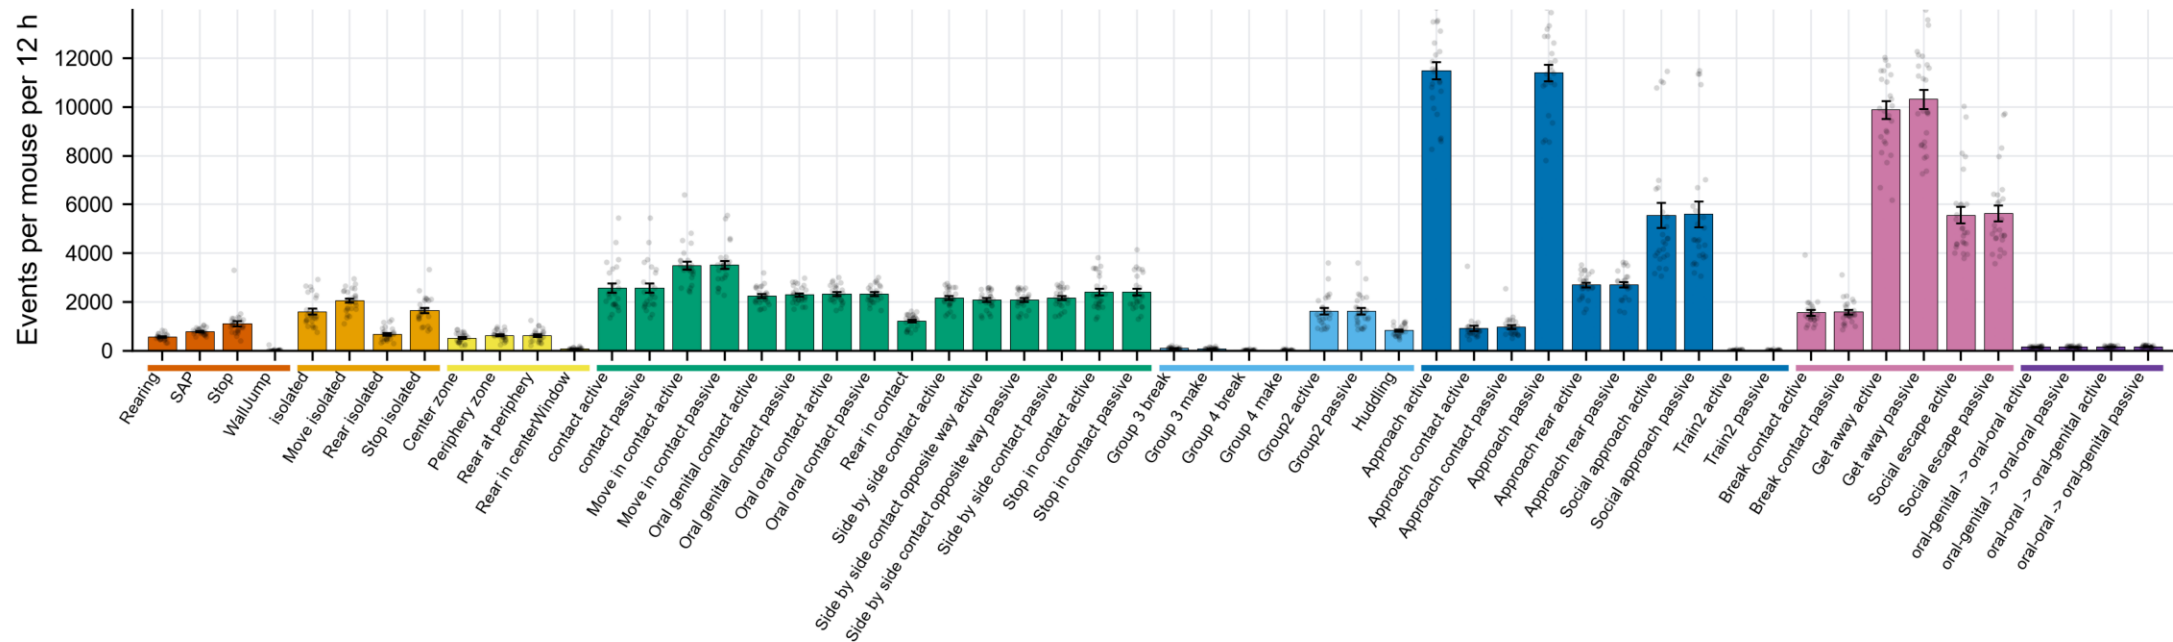

Control mice - Post-stress day behavioral profile: raw event counts

Stressed mice: raw event counts: post-stress

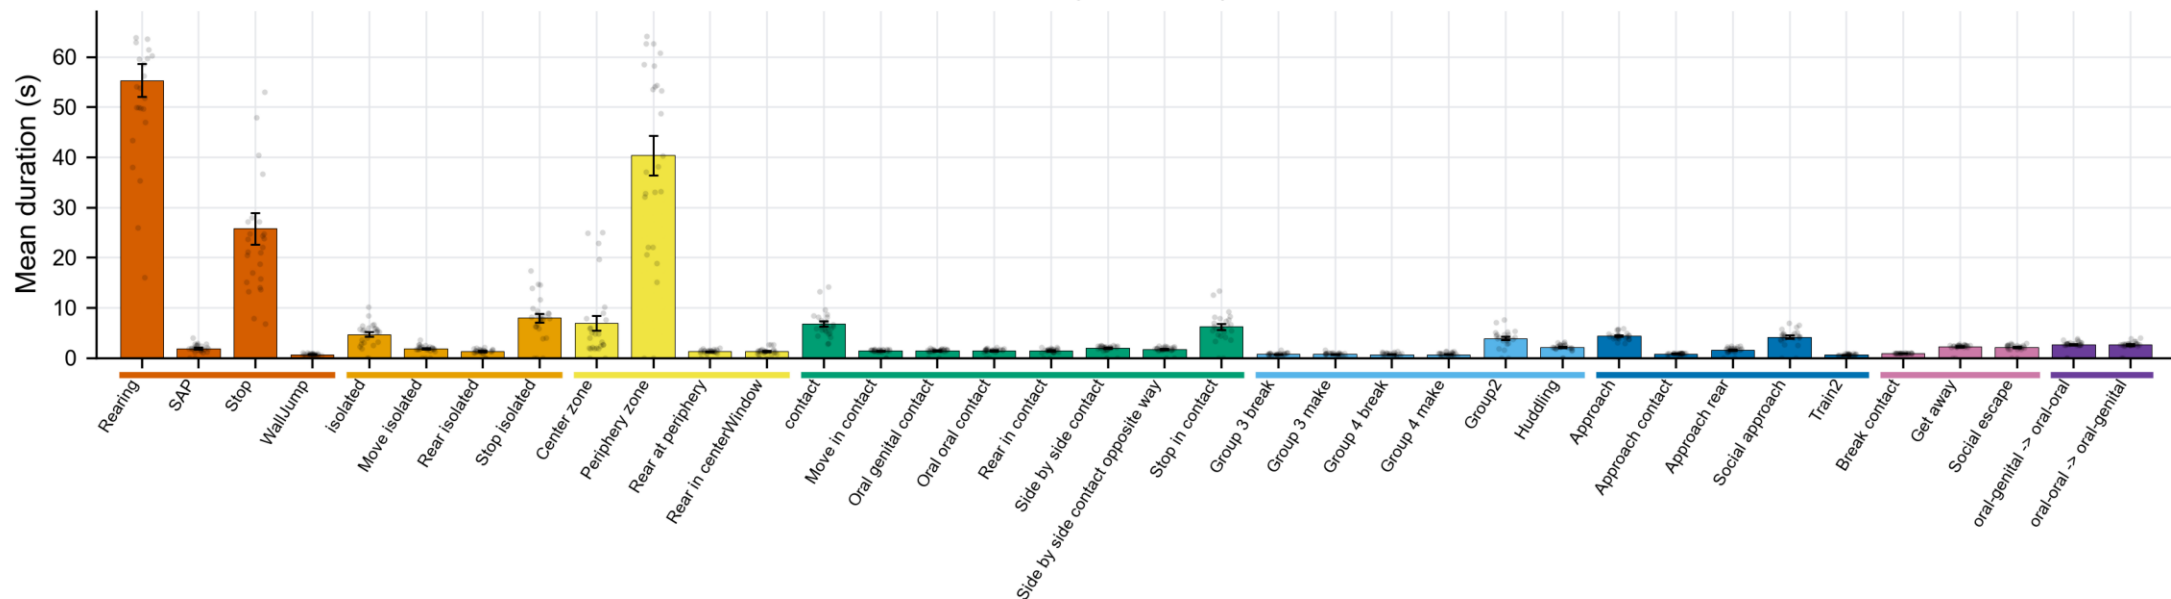

Stressed mice - Post-stress day behavioral profile: raw event counts

Control mice: raw mean duration: pre-stress

- Body configuration
- Isolated behavior
- Position/context
- Contact type
- Social configuration
- Social approach
- Social escape
- Contact sequence

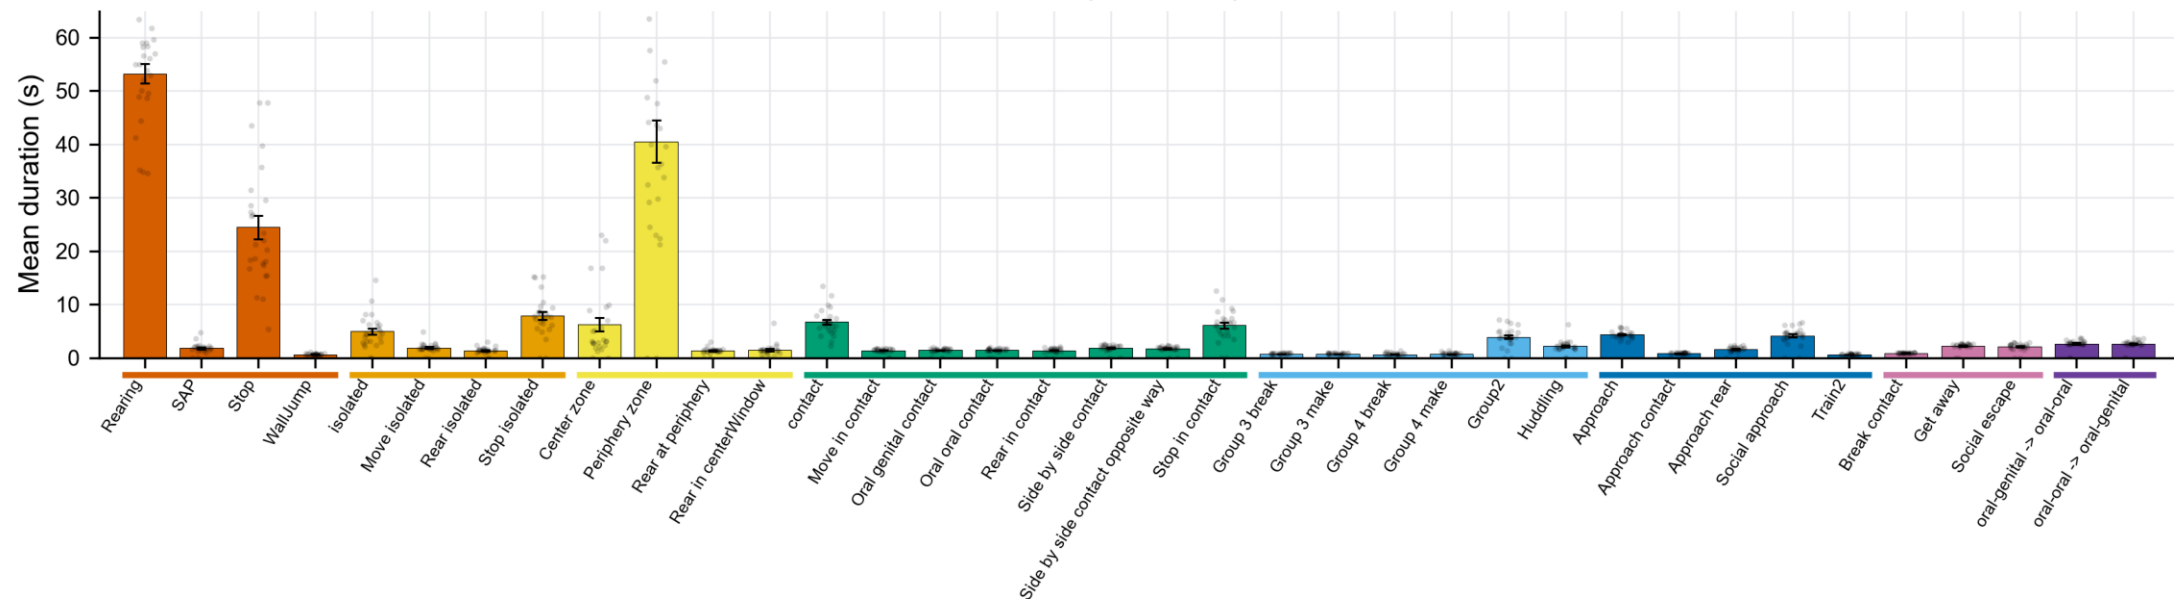

Control mice - Pre-stress day behavioral profile: raw mean duration

Stressed mice: raw mean duration: pre-stress

■ Body configuration ■ Position/context ■ Social configuration ■ Social escape ■ Contact sequence
■ Isolated behavior ■ Contact type ■ Social approach

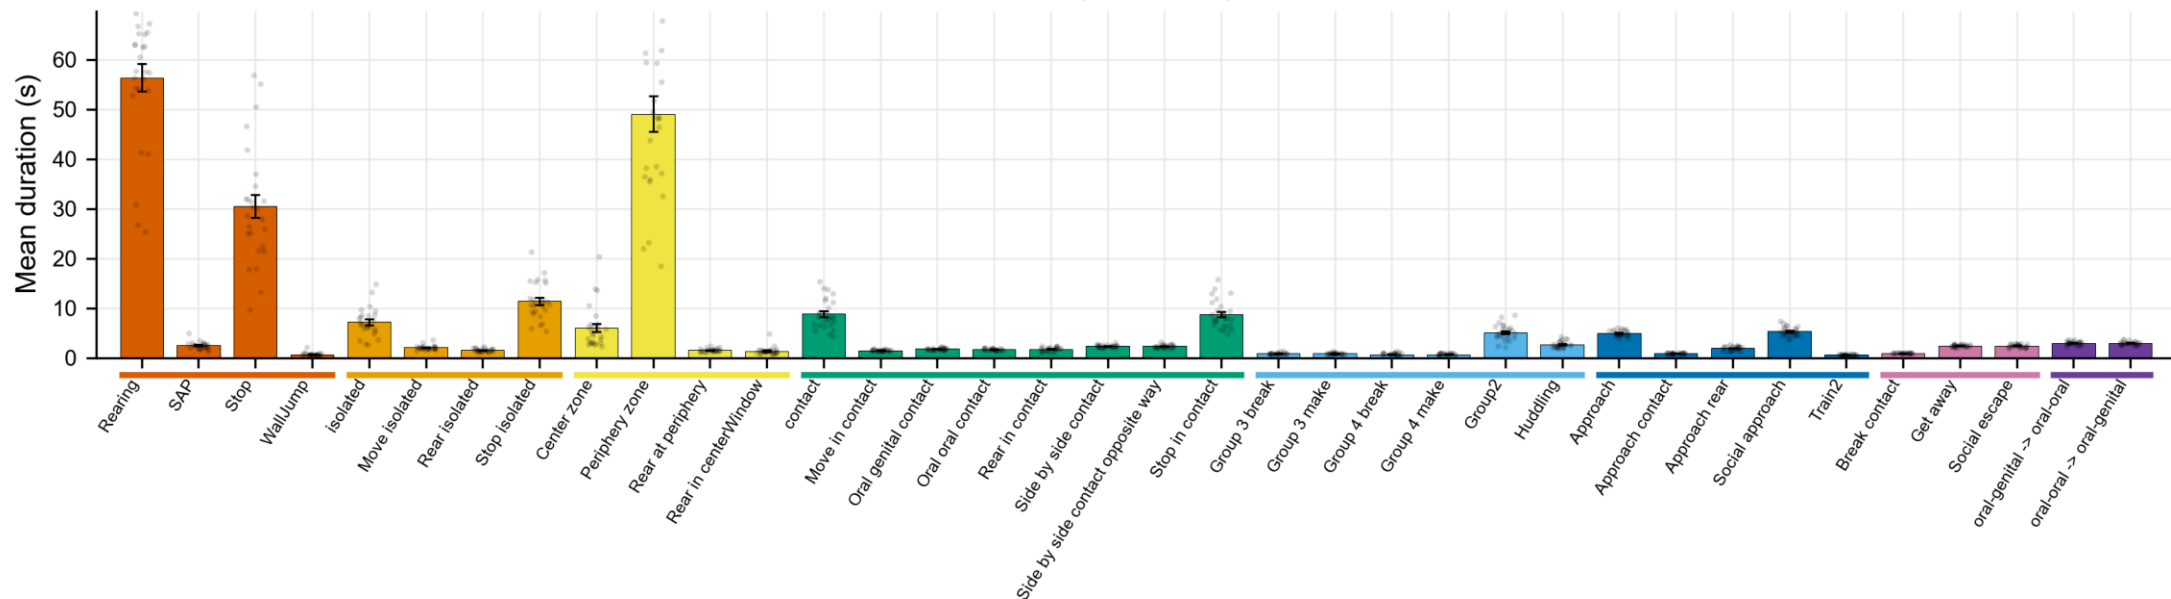

Stressed mice - Pre-stress day behavioral profile: raw mean duration

Control mice: raw mean duration: post-stress

- Body configuration
- Isolated behavior
- Position/context
- Contact type
- Social configuration
- Social approach
- Social escape
- Contact sequence

Control mice - Post-stress day behavioral profile: raw mean duration

Stressed mice: raw mean duration: post-stress

- Body configuration
- Isolated behavior
- Position/context
- Contact type
- Social configuration
- Social approach
- Social escape
- Contact sequence

Stressed mice - Post-stress day behavioral profile: raw mean duration
